

Commissioners
Superintendent's Report

November 3, 2025

System Usage	2025	2024
October	8,404,817	6,310,000
Daily Average	271,284	203,548
Max Daily	503,179	280,000
Year to Date	78,610,370	70,327,000

1. Meter reading is done aside from the summer route book.
2. MidCo Diving is scheduled to be here Wednesday through Friday to clean the tanks.
3. NHDES was here last week to sample each well individually for PFOA. This is a more detailed analysis than was previously done in July for EPA.
4. Jon's last day was Friday. He will be returning in May. He did a great job training Tony.
5. Tony took his licensing tests last week. It should be about a month before we know the results.
6. The ADU water service on Old Main St. was installed last week.
7. A service line water leak was discovered at 85 Farwell Lane last week. Seneca and Son's replaced the whole service line to the curb.

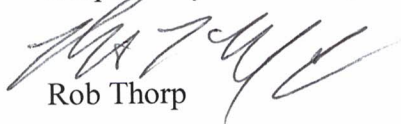

Workload

Backflow Testing

Tank Inspections

Instrument Calibrations

Respectfully Submitted,

Rob Thorp
