

System Usage	2025	2024
March	6,300,000	5,060,000
Daily Average	203,225	163,225
Max Daily	290,000	280,000
Year to Date	17,990,000	15,790,000

1. Jon started meter reading and has completed book one.
2. I received a quote for tank cleaning from Diving and Marine Services. The price is very reasonable at \$12,708.00. I checked with DES and there have been no issues with this company.
3. The Operator job posting has been posted for about three weeks. We have received two resumes.
4. The work on Colby Point has been moving along. Sea Board Drilling did not complete the final well and will be back around April 30<sup>th</sup> to finish up.
5. Quarterly reports are complete and submitted to DES.
6. Samples for Radium 226, 228 and Uranium have been collected and sent to the lab.
7. Cyber security training was eye opening. Maggi and I will have to discuss procedures should we have a breach. Primex placed a lot of emphasis switching our web and email service to a .GOV account for more security. Maggie and I will look into this.

**Workload**

Backflow Testing  
Service Line Inventory  
Meter Reading

Respectfully Submitted,

Rob Thorp
