

System Usage	2025	2024
February	5,810,000	5,610,000
Daily Average	193,666	187,000
Max Daily	310,000	320,000
Year to Date	76,137,000	71,780,000

1. The taste and odor complaints from the Barrett Rd. area seem to have quieted down. We still have one customer who claims to have radon in their water. They had a filter company perform some tests and they claim they have radon. I explained that there is little to no radon in our source water, and it certainly shouldn't increase once the water is in the distribution system. I advised the customer to have another test done by a different company.
2. Employee reviews are done and ready for your review.
3. The Main St. project is wrapped up for the year. Striping is done. There was some concern about the cross trenches being too high. I spoke with Peter Powers from NHDOT, and he said all went well with snow plowing.
4. Dan Tinkham from GZA had a crew on Colby Point last week conducting an electrical resistivity survey. Today, he has someone out there collecting passive seismic data.
5. A&D Instruments were able to get the well data off the SCADA system. I sent this information to Dan Tinkham.
6. Merzi Construction installed a new fire line at the old Crocket Farm. The pressure test was conducted today.

**Workload**

Backflow Testing  
Booster Chlorine Analyzer  
Service Line Inventory

Respectfully Submitted,

Rob Thorp
