

Commissioners
Superintendent's Report

January 8, 2024

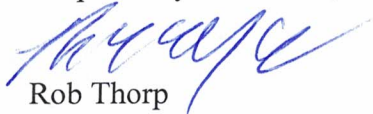

System Usage	2023	2022
December	5,410,000	5,060,000
Daily Average	174,516	163,225
Max Daily	280,000	250,000
Year to Date	77,190,000	80,178,000

1. The advertisement for bids for the Main St. project went out in the Union Leader today.
2. A&D Instruments calibrated our master meter, chlorine analyzer and PH meter.
3. Jon and Rod have been busy performing meter change outs. Rhonda had us put out door hangers requesting the owners contact us to make an appointment. This is having better success than mailing letters.
4. Micah Seneca worked on the service line leak at 50 Ice House Lane. He got the problem area taken care of. We will continue to monitor this area to make sure.
5. Jon noticed an illegal water hook up at 255 Newport Rd. (Concord Orthopedics) a couple of months ago while doing a backflow test. We contacted Crosspoint (the property managers) via letter and received no response. Rhonda contacted them again by phone, and I was able to meet with them on site. They are correcting this issue.

Workload

Backflow Testing
Settling Basin Road
Meter Change Outs

Respectfully Submitted,

Rob Thorp
